

Engineering Eco-System

Engineering, quality and material support

SSI Aerostructures is the leader in providing unparalleled engineering, quality, and material support throughout the life cycle of a product's development. We have already provided 30+ years of product support in an efficient and cost-effective manner to numerous programs. SSI Aerostructures is prepared to work cohesively across all disciplines to meet your quality and customer satisfaction requirements.

Our experienced staff can work within the digital thread and ensure the accuracy and completeness of tooling, detail parts, and assemblies.

Using digital scanners & Portable Coordinate Measuring Machines (PCMM) in conjunction with traditional measuring techniques we can accurately track all measurable aspects of your project.

Our exceptional customer service will provide you with a superior level of care through planning, scheduling, status updates, and performance metrics. Systematic communication to keep projects moving forward from development through production is a core competency of SSI Aerostructures. Whether you need cost optimization, development strategies, or production solutions, our support team stands ready to engage and take action.

- ✔ **Quality** - Using current technology to accurately provide quality data.
- ✔ **CAD / CAM & DPD / MBD** - Using the latest digital technologies to ensure accuracy.
- ✔ **Support** - From purchasing to quality, providing solutions with creative ideas and methods.

We're here to help
